申请动机

未来抱负

我未来想成为立足国际视野、基础扎实、有“见识”的金融人才，并能回馈社会。为此，需要不断提升自身能力，进入更优秀的环境，才能将理想付诸实现。

拓展视野

我具备多元且系统性的思维，对任何事情都尽量避免先入为主，能够洞察哪些事物具有未来性；但我也清楚地意识到，自己与一流学者专家之间，仍然存在能力、经验与视野上的差距。同时，我非常看好中国在世界舞台上的崛起态势，并深受触动，不满足于仅停留在台湾，而是希望真正进入世界规模的环境中，获得未来参与实践并见证民族崛起的基础。

生命追求

因此，我希望能够进入贵系这样具备国际水准、资源丰富的系所，在与优秀专家和同侪的互动中，使人生轨迹在此刻实现一次“升维”。

学习历程

从建筑到经济的转变

原先就读于知名的东海建筑系，训练抽象与系统性思维，使我能以不同角度解读现象。在此期间，我也持续关注宏观经济并开始投资股票，不久便遇上2020年新冠疫情，股市暴跌，给我上了深刻一课，促使我进一步接触指数、农产品与金属等期货交易。

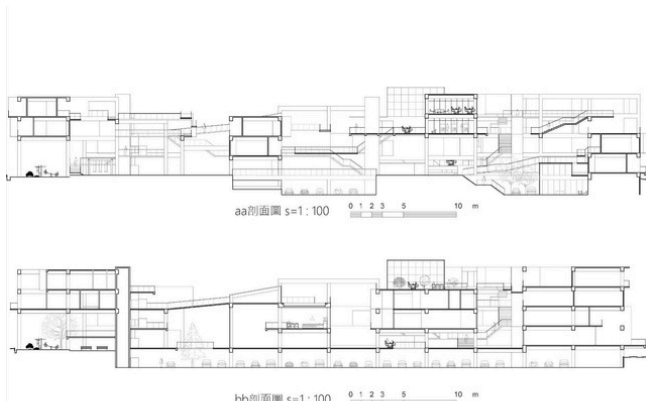

另外，在接触社区建筑案例时，我意识到建筑往往受到制度与宏观经济的影响，许多问题需从社会科学的维度才能解决，而建筑只是工程领域中的一种哲学，对我来说只是兴趣。我发现自己真正热爱经济与金融市场，遂毅然决定转学考入政治大学经济系。

多元学科与经济的结合

在经济学习乐在其中，因此成绩良好，也乐于挑战赛局(博弈)论产业经济等理论课程，并尝试在劳动经济学、贫穷经济学等不同领域开展。

在具备经济系的理论基础后，我希望进一步拓展视野，学习更贴近现实运行机制的知识，例如商业与商品如何运作与流通，以及其如何牵动国际协定与相关规则等内容，因此选择**双主修国际贸易系**。

此外，政治作为经济学的重要源头，涉及制度设计、历史经验以及政治哲学思想的讨论，不仅与我的个人兴趣契合，也与经济学有着极为紧密的联系，因此**辅修政治系**。

社區設計((2021))

圖書館設計(2021))

科研能力

充实学习，亦面面俱到

目前累计修读200学分（不含东海建筑系大部分课程），无论是本系还是跨系课程，均保持良好成绩，且未曾中途退修任何一门课。因为我不喜欢轻易给予自己放弃的机会。

勇于挑战困难，克服挫折

大三期间修读两学期的”数理统计”，第一学期对课程内容理解不够深，第二学期主动调整学习态度，频繁与同学和老师讨论，最终以94分取得高分。与此同时，大三下学期所修的”商情预测”涉及我最不擅长的程序语言，导致期中考试成绩极不理想，但我并未选择放弃，而是积极弥补不足，最终在期末考试中成功扳回局面。

大四期间修读的”土地法”被公认为大学部最难的课程之一，同时也是地政系的必修课，历来约有四成学生未能通过。基于对该领域的兴趣，我仍选择主动挑战并顺利通过，证明了自身的法学理解与逻辑推理能力。

领域	相关课程(成绩)
经济与财政	个体经济（99、99）、总体经济（99、99）、货币银行学（87、84）、国际金融（87）、国贸理论与政策(100)、博弈理论（88）、产业经济、贫穷经济学（96）、计量经济（78、84）、经济数学（93）、财政学（87、89）、租税法
国贸与商管	会计学、财务管理（98）、投资学（73）、国际营销管理（87）、国际买卖法（87）、国际经贸法（86）、商情预测（62）、财务报表分析（85）、跨国企业国际税收管理（95）
政治	比较政府与政治、国际关系、中国大陆政府与政治
地政	土地法、都市计划法
其他	民法概要、数理统计学(80、94)

实习与社会实践

业界实习：工业技术研究院

2024年7月至12月，我在工业技术研究院产科国际所的新兴市场组实习，负责协助新兴经济体的产业研究，建立资料并制作简报，内容涵盖台商投资项目、进出口数据、税收优惠等。期间曾参与相关专案，对越南电动商用车未来市场规模进行预测。在资料相对匮乏的情况下，这是一次不小的挑战，也让我学会如何运用宏观经济数据，对周边国家的电动车发展进行比较，从而估算销量与渗透率。该次实习使我对产业界的实际应用有了更深入的认识，并提升了逻辑分析能力。

教育部大学社会责任实践（USR）计划研究助理

自2020年5月3月至今，主要负责社会影响力报告书的制作工作，包括访谈或问卷调查利害关系人、计算投入产出、建立代理变量等。通过该过程，我学习了如何取得影响力相关数据并将其货币化，同时评估影响期间与强度，进而计算最终的投资回报率。

农村规划暨社会实践

2025年8月，我在台湾高雄市美浓区参与农村田野学会的城乡规划实习，驻村一个月并深入融入当地生活。通过田野调查，研究当地资源配置情况，访谈居民，并参与“农地蓄水”工程。美浓虽为优质农业区，但亦存在资源错置与农村景观破坏等问题。与过往认知不同的是，我逐渐意识到部分农村地区并非贫困，而是收入水平较高却缺乏适当的投资管道，这也促使我希望从金融视角进一步研究农村与地方经济成长。

农地蓄水

结识法国导演

竞赛与社团

多方尝试，跨域结合

参加许多不同领域的社团与竞赛，从产业与个股分析到资产配置，从营销到商业不动产，从兴趣到学术应用，在享受过程的同时，也帮助我探索自我。

培养兴趣，建立人脉

在闲暇之余陶冶性情，让生活更加美好，同时也结识了许多朋友。

竞赛	时间	内容
国泰建设厝客松商业竞赛	2024.Dec. – 2025.Jan.	担任队长，整合各领域知识，包括经济、地政与建筑空间设计，带领队员完成商业不动产专案；并主要负责成本效益分析与空间利用部分。
2023玉山银行校园商业竞赛	2023.Oct. – Nov.	研究普惠金融，构思商业模式，结合环境永续议题，发展营销策略。
柜买中心大学生资产配置菁英种子营	2023.Jun. – 2023.Jul.	宏观经济分析、产业研究（生技）、资产配置。
长荣酒店翻玩经典营销企划竞赛	2023.Jul.	商业模式构思与营销规划。

竞赛与社团

社团活动	时间	内容
政大学生议会议员	2025.Feb. – 2025.Dec.	审查预算与决算，创立与修改法案
模拟立法院	2024.Aug.	体验国会立法过程、协商与公开讨论。担任公共健康与卫生委员会召委，研究人工生殖法各方提案。
政大证券研习社干部 / 专案生	2023.Sep. – 2024.Jun.	担任干部，制作产业与个股报告，内容包括宏观经济分析、产业研究（纺织、家饰）、公司财报分析、信息解读与财务模型建立。在期中与期末发表会上多次获得前三名。
政大美术社干部	2022.Sep. – 2023.Jun.	负责教学与财务相关事务。
经济系乒乓球队	2022.Sep. – present	创立球队并带领队员进行训练。

未来研究计划

负投资之收入异质性与城投债对收入增长影响分析

研究动机

农村规划实习引起了我对研究地方金融的兴趣；在修读贫穷经济学时，我也接触到印度小额信贷的案例。作为在信息不对称条件下应对高利贷问题的解决方案，它是金融普及的优秀实践。此外，近年来城投债累积所引发的一些问题同样值得研究，这也促使我希望向地方金融与投资方向进一步深入。

既有文献指出，农村部门的投资回报率低于城市，金融机构倾向于将农村存款挪用于城市放贷，导致本地贷款小于存款，形成负投资，从而抑制农村实体投资与收入增长（王曙光、李冰冰，2013）。然而，当农户积累了一定财富、足以支撑生产扩张时，净资金外流是否仍构成投资约束，是本研究所关注的问题。同时，农村收入的提高本身也可能加剧负投资：盈余资金存入银行后，由于缺乏足够的本地投资机会而外流，从而形成收入与负投资之间的交互关系。

此外，地方金融负投资可能通过地方政府融资平台与城投债加以体现。国有城投公司将资金投入覆盖城市及周边乡村的基础设施建设，对农村经济产生正向溢出效应；但与此同时，也可能挤出原本可能流向农户与地方企业的信贷。因此，地方政府城投债务的规模与结构，究竟如何调节金融负投资对农村经济增长的影响，亦是待回答的问题。

本研究将以县域与农村为分析单位，结合“金融负投资—收入异质性”与“地方政府城投债发行—农村收入”两个研究视角展开检验：

1. 负投资抑制增长的效果是否具有收入门槛与制度条件上的差异？
2. 城投债的“基建带动”与“信贷挤出”双重角色，对该地区农村收入增长有何影响？

文献回顾

王曙光、李冰冰（2013）建立协整模型，发现负投资会抑制地方增长，而固定资产投资则能够带动增长；农村增长以及固定资产投资均能提高人均收入；城乡差距会加剧负投资，但负投资并非城乡差距的主要成因。

刘晓蕾（2021）分析地方政府隐性债务负担率如何影响城投债的利差，其结果反映了市场所认知的担保主体如何随时间发生变化。该研究以地方所有城投平台的有息债务总额占一般公共预算收入、地方GDP与地方固定资产投资的比例作为隐性负担率指标，采用包含年份与发行主体固定效应的面板回归模型进行估计，发现负担率与城投债信用利差之间存在显著正相关关系。

未来研究计划

研究资料与方法

本研究分为两个部分。第一部分以省级或地级市层面的农村负投资率与农村经济增长率构建面板数据，数据来源包括各省金融报告与《中国统计年鉴》。若条件允许，将进一步使用县级或乡镇级数据。在采用县级数据的情形下，设置省份与时间固定效应，建立如下模型：

$$Grate_{i,p,t} = \alpha + \beta^{out} Out_{i,p,t} + \beta^{in} In_{i,p,t} + \gamma' X_{i,p,t} + \mu_p + \lambda_t + \varepsilon_{i,p,t}$$

其中 $Grate_{i,p,t}$ 表示该农村地区的收入增长率。

$Out_{i,p,t}$ 与 $In_{i,p,t}$ 分别表示负投资率或正投资率，其中仅有一项为非 0。

$X_{i,p,t}$ 为其他控制变量，如固定资本投资等。

μ_p 为省份固定效应， λ_t 为年份固定效应， $\varepsilon_{i,p,t}$ 为随机项。

接着引入收入对负（正）投资率影响的门槛效应，以各省农村收入的中位数作为门槛值，将样本划分为高收入与低收入两组，建立如下模型：

$$Grate_{i,p,t} = \alpha + \beta^{H,out} Out_{i,p,t} \cdot High_{i,p,t} + \beta^{L,out} Out_{i,p,t} \cdot Low_{i,p,t} + \beta^{H,in} In_{i,p,t} \cdot High_{i,p,t} + \beta^{L,in} In_{i,p,t} \cdot Low_{i,p,t} + \gamma' X_{i,p,t} + \mu_p + \lambda_t + \varepsilon_{i,p,t}$$

其中 $High_{i,p,t}$ 与 $Low_{i,p,t}$ 分别为高收入与低收入地区的虚拟变量。

随后，进一步检验高收入增长与地区负投资之间的交互作用关系，构建 VAR 模型，该部分可在个别地区层面进行检视。

以地级市层面的城投债发行规模与该地区农村收入增长率构建面板数据，模型设定如下：

$$g_{i,t} = \alpha + \delta Issue_{i,t} + \gamma' X_{i,t} + \lambda_t + \varepsilon_{i,t}$$

其中 $Issue_{i,t}$ 表示当年新增城投债净发行额占该地区 GDP 的比重，作为发行强度指标

λ_t 为年份固定效应。

进一步设定收入中位数门槛 γ ，建立如下模型：

$$g_{i,t} = \alpha + \delta^H Issue_i \cdot High_{i,t} + \delta^L Issue_i \cdot Low_{i,t} + \gamma' X_{i,t} + \mu_i + \lambda_t + \varepsilon_{i,t}$$

其中 δ^H 与 δ^L 分别表示高收入与低收入地区城投债发行对地区增长率的影响；而 $High_{i,t}$ 与 $Low_{i,t}$ 为高收入与低收入地区的虚拟变量。

未来研究计划

预期结果以及展望

预期在第一部分的模型中， $\beta^{L,out}$ 将低于 $\beta^{H,out}$ ，且前者为负值，而后者未必为负。这意味着，对低收入地区而言，负投资将显著抑制经济增长；而对高收入增长地区来说，其影响可能相对有限。在第二部分中，预期 δ^H 将高于 δ^L ，这是因为城投债的投资范围可能更接近高收入地区，从而产生更为明显的外溢效应。

未来，我希望能够进一步研究金融系统，深化对地方金融的理解，并结合银行资产结构、理财产品配置以及债券持有人结构等因素，评估资金错配的来源与演变。同时，我也期望将研究视野拓展至区域金融层面，比较不同省份、不同金融环境下，在地方债务、监管政策与金融创新共同作用之下，资金流向与实体经济表现的差异与机制。

自我期许

希望未来能够读懂制度与宏观格局，并对现实问题具备深度分析能力，进而对金融体系优化提出有价值的观点。我相信，中华民族伟大复兴必须伴随优秀的金融实践人才；而我能够做的，就是**将自己锻炼成为一名站得住脚的年轻研究者与实践者**。若有幸录取，未来我将尽我所能弥补不足、发挥所长，在中国金融发展与制度完善的进程中找到自己的立足之地。

Motivation

Future Aspirations

My aspiration is to become a finance professional with a solid foundation and a global perspective, and to contribute to society. Achieving this requires continuous development in a rigorous academic environment.

Broaden my perspective

I take a systematic, open-minded approach and recognize the gaps between myself and leading scholars. Motivated by China's rise on the global stage, I seek a truly global academic environment to build the foundation for future contribution.

Life Aspirations

Therefore, I aspire to join a department of international standing and rich academic resources, where interaction with distinguished faculty and peers can elevate my intellectual development at this pivotal stage.

Education

Transition from Architecture to Economics

I began my studies in architecture at Tunghai University, where training in abstract and systematic thinking shaped my analytical perspective. During this time, I developed an interest in macroeconomics and financial markets, an interest deepened by the market turmoil during the COVID-19 pandemic in 2020.

Through exposure to community-based architectural projects, I realized that many architectural outcomes are fundamentally shaped by institutional and macroeconomic forces and are better examined through the social sciences. Recognizing that my true passion lay in economics and financial markets, I chose to transfer to the Department of Economics at National Chengchi University.

Integrating Multidisciplinary Perspectives with Economics

I found my studies in economics highly engaging and performed well academically, particularly in theoretical courses such as game theory and industrial organization, while exploring fields including labor and poverty economics. Seeking to broaden my perspective toward real-world economic mechanisms, I pursued a double major in International Trade to better understand business operations and global economic rules, and minored in Political Science to deepen my understanding of institutions and their close relationship with economics.

Research Skills

Well-rounded and rigorous training

I have completed approximately 200 credits with consistently strong performance and no course withdrawals, demonstrating sustained commitment and academic discipline.

Willing to embrace challenges and overcome setbacks

In my junior year, I improved from an initial difficulty in Mathematical Statistics by adjusting my study approach and achieved a final score of 94, and overcame programming challenges in Business Forecasting after a poor midterm through sustained effort. In my senior year, I successfully completed Land Law, one of the most challenging undergraduate courses, demonstrating strong legal comprehension and logical reasoning.

Fields	Relevant Coursework (Grades)
Economics and Public Finance	Microeconomics (99 、99) 、Macroeconomics (99 、99) 、Money and Banking (87 、84) 、International Finance (87) 、International Trade Theory and Policy (100) 、Game Theory (88) 、Industrial Economics 、Poverty Economics (96) 、Econometrics (78 、84) 、Mathematical Economics (93) 、Public Finance (87 、89) 、Tax Law
International Business Administration	Accounting 、Financial Management (98) 、Investments (73) 、International Marketing Management (87) 、International Sales Law (87) 、International Economic and Trade Law (86) 、Business Forecasting (62) 、Financial Statement Analysis (85) 、International Tax Management for Multinational Enterprises (95)
Political Science	Comparative Government and Politics、 International Relations、 Government and Politics of Mainland China
Land Economics	Land Law、 Urban Planning Law
Others	Introduction to Civil Law、 Mathematical Statistics (80、 94)

Internships and Social Practice

Industry Internship: Industrial Technology Research Institute (ITRI)

From July to December 2024, I interned with the Emerging Markets Group at the Industry, Science and Technology International Strategy Center (ISTI) of the Industrial Technology Research Institute (ITRI). I assisted with industrial research on emerging economies, including data compilation and presentation development covering Taiwanese overseas investment projects, trade statistics, and tax incentives. I also participated in a project forecasting the future market size of electric commercial vehicles in Vietnam. Despite limited data availability, I applied macroeconomic indicators and cross-country comparisons to estimate sales volumes and market penetration rates. This internship deepened my understanding of real-world industrial applications and strengthened my analytical and logical reasoning skills.

Research Assistant, University Social Responsibility (USR) Program

Since March 2025, I have been primarily responsible for preparing social impact reports, including conducting stakeholder interviews and surveys, calculating input-output relationships, and constructing proxy variables. Through this process, I learned how to collect impact-related data, monetize social outcomes, assess impact duration and intensity, and ultimately compute investment returns.

Rural Planning and Social Practice

In August 2025, I participated in a rural planning internship with a rural fieldwork association in Meinong District, Kaohsiung City, where I resided in the village for one month and closely engaged with local life. Through field surveys, I examined local resource allocation, conducted resident interviews, and took part in a farmland water-retention project. While Meinong is a high-quality agricultural area, it also faces challenges such as resource misallocation and degradation of rural landscapes. Contrary to my prior assumptions, I came to recognize that some rural areas are not poor but instead exhibit relatively high income levels with limited investment channels. This insight motivated me to further study rural and local economic growth from a financial perspective.

Competitions and Organizations

Exploring multiple approaches and integrating across disciplines

I engaged in a wide range of organizations and competitions across diverse fields—from industry and equity analysis to asset allocation, and from marketing to commercial real estate—allowing me to translate personal interests into academic applications while refining my academic and professional focus.

Cultivating interests and building professional networks

In my spare time, I pursue activities that enrich my life and allow me to connect with many friends.

Competition	Period	Content
Cathay Real Estate Case Competition	2024.Dec. – 2025.Jan.	Served as team leader, integrating knowledge across economics, land administration, and architectural spatial design to complete a commercial real estate project, with primary responsibility for cost-benefit analysis and spatial utilization.
E.SUN Bank Marketing Competition	2023.Oct. – Nov.	Researched financial inclusion, designed business models, and developed marketing strategies integrating environmental sustainability considerations.
Taipei Exchange (TPEX) Asset Allocation Competition	2023.Jun. – 2023.Jul.	Macroeconomic Analysis, Industry Research (Biotechnology), Asset Allocation
Evergreen Hotels Marketing Competition	2023.Jul.	Business Model Design and Marketing Strategy Development

Competition	Period	Content
Student Council Representative	2025.Feb. – 2025.Dec.	Reviewed budgets and final accounts; drafted and amended legislation
Mock Legislative Yuan	2024.Aug.	Experienced the legislative process, including negotiation and public deliberation. Served as Convener of the Public Health and Hygiene Committee, analyzing competing proposals on the Artificial Reproduction Act within the Legislative Yuan.
Executive Officer / Project Associate, NCCU Securities Research Club	2023.Sep. – 2024.Jun.	Served as an executive officer, producing industry and equity research reports covering macroeconomic analysis, industry research (textiles and home furnishings), financial statement analysis, information interpretation, and financial modeling. Achieved top-three rankings in multiple midterm and final presentations.
Officer, NCCU Fine Arts Club	2022.Sep. – 2023.Jun.	Responsible for instructional coordination and financial management.
Department of Economics Table Tennis Team	2022.Sep. – present	Founded the team and led training sessions.

Research Plan

Income Heterogeneity of Investment and the Impact of Local Government Financing Vehicles (LGFVs) on Income Growth

Research Motivation

My interest in local finance emerged from a rural planning internship and was reinforced through coursework in poverty economics, particularly studies of microfinance in India as a response to usury under information asymmetry. In addition, recent issues surrounding the accumulation of local government financing vehicle (LGFV) debt have further motivated my interest in local finance and investment.

Prior literature finds that lower returns in rural areas lead financial institutions to reallocate rural deposits to urban lending, resulting in negative investment that constrains rural income growth (Wang & Li, 2013). However, whether such capital outflows continue to restrict investment when rural households accumulate sufficient wealth remains unclear. Rising incomes may also intensify negative investment due to limited local investment opportunities, creating an interaction between income growth and capital outflows.

Negative financial investment may also be reflected in LGFVs and local government bonds. While LGFV-funded infrastructure can generate positive spillovers for rural economies, it may also crowd out credit to households and local firms. This study therefore examines counties and rural areas, focusing on income heterogeneity and LGFV bond issuance to assess their effects on rural income growth

- 1. Does the growth-inhibiting effect of negative investment vary across income thresholds and institutional conditions?**
- 2. How do the dual roles of LGFV bonds—infrastructure-driven growth and credit crowding-out—affect rural income growth in the region?**

Literature Review

Wang and Li (2013) employ a cointegration model and find that negative investment suppresses local economic growth, whereas fixed asset investment promotes growth. Both rural economic growth and fixed asset investment increase per capita income. They also show that urban–rural disparities exacerbate negative investment, although negative investment is not the primary cause of the urban–rural gap.

Liu (2021) examines how the burden ratio of local governments' implicit debt affects the credit spreads of LGFV bonds, capturing changes over time in market perceptions of implicit guarantees. Using panel regressions with year and issuer fixed effects, the study measures the implicit burden as the ratio of interest-bearing LGFV debt to general public budget revenue, local GDP, and local fixed asset investment. The results indicate a significantly positive relationship between the burden ratio and LGFV bond credit spreads.

Research Plan

Data and Methodology

- Construct a panel dataset at the provincial or prefecture-level city level using rural negative investment rates and economic growth rates, incorporating province and time fixed effects and introducing threshold effects.
- Examine the interaction between high income growth and regional negative investment by estimating a VAR model.
- Build a panel dataset linking the scale of LGFV bond issuance to rural income growth in the region.

Expected Results and Implications

In the future, I aim to further study the financial system by deepening my understanding of local finance and evaluating the sources and evolution of capital misallocation through dimensions such as bank balance sheets, wealth management product allocations, and bondholder structures. I also plan to extend the analysis to the regional finance level, comparing how capital flows and real economic outcomes differ across provinces and financial environments under the joint influence of local government debt, regulatory policies, and financial innovation.

Personal Aspirations

I aspire to develop a deep understanding of institutions and the macroeconomic landscape, and to acquire the capacity for rigorous analysis of real-world issues, thereby contributing meaningful insights to the improvement of the financial system. I believe that national development must be accompanied by capable financial practitioners, and my goal is to train myself into a grounded young researcher and practitioner. If admitted, I will strive to address my shortcomings and build on my strengths, seeking my place in the advancement of China's financial development and institutional refinement.
